Electrical engineer graduated from the University of the Republic.

His professional career has focused on industrial low voltage electrical projects, electrical studies in regime and dynamic transmission networks, lighting projects, substation works, protection against atmospheric discharges and rural electrification.

He has worked for different companies in the field of energy, industrial lighting and road, as well as independent consultant for professionals and companies in the field.

He was a professor (2017-2019) and coordinator (2018-2019) of the Extension Department of the Faculty of Engineering of the University of the Republic coordinating projects and providing courses of the Unit.

He is currently conducting electrical supervision in the construction of the new UPM plant in Paso de los Toros. Tasks involve engineering and construction supervision.
